Computer Engineer specialized in fullstack application development, with experience in builder management, administration, and data analysis platform using modern technologies such as NestJS, React, PostgreSQL. Strong knowledge in software architecture, API development, and programming best practices. Known for continuous learning ability, teamwork, and a focus on creating scalable, maintainable, and efficient solutions.

PROFESSIONAL EXPERIENCE

ETECSA

Senior Developer

Havana, Cuba

October 2025 - Present

- Designed and developed backend services using **NestJS** and **PostgreSQL** for internal data analysis and management platforms.
- Modeled and optimized database structures, improving query performance and data integrity.
- Implemented secure **REST APIs** for user management, reporting, and statistical data used across multiple organizational areas.
- Implemented CI/CD practices to improve software delivery efficiency, reducing errors and deployment times by more than 80%.
- Led web performance improvements and administrative products, mentoring teams on best practices, creating dashboards, and designing optimization strategies.

Freelancer

FullStack Developer

Havana, Cuba

April 2022 - October 2025

- Developed a unified platform of components and tools for different company products to archive technical convergence and accelerate product delivery for **Dealernode** and **Visa4Cuba**.
- Deployed web applications on Linux servers and cloud platforms, configuring services on **AWS** and automating basic deployment processes.
- Performed maintenance and evolution of existing systems, fixing bugs and improving application performance.
- Implemented web interfaces based on **Figma** designs, using **Angular** to develop interactive components and forms.
- Collaborated in the initial deployment of applications in testing environments, configuring servers and verifying system functionality.
- Identified and fixed interface and functionality issues reported during the testing process.

EDUCATION

Technological University of Havana “José Antonio Echeverría” (CUJAE)

Bachelor’s Degree in Computer Engineering

Havana, Cuba

September 2021 - July 2025

ADDITIONAL SKILLS

- Programming Languages: Python, Typescript, Go
- Frontend Technologies: React, Nextjs, Vuejs
- Backend Technologies: Nestjs, Django, GrapghQL
- Database: PostgreSQL, MongoDB
- Languages: Native Spanish, Fluent English.
